TO WHOM IT MAY CONCERN

MTN SA reached a maturity stage for ISO management systems and required an integration of all ISO systems (ISO 9001:2015, ISO 14001:2015, ISO 27001:2013, ISO 20 000-1:2011 and OHSAS 18001:2007). WWISE was sourced to provide these services and proved to be the right decision to achieve this task.

The WWISE team was dedicated towards achieving this objective and guided MTNSA management and staff towards meeting the requirements of the standards. The scope of work included training, implementation and auditing services and the objective was exceeded as they provided a full turnkey service and played a significant role towards the achievement of the ISO systems certification. WWISE continues to support the maintenance of the ISO management system certification and is always willing to help and provide backup service when required.

I have worked with the WWISE team and found them to be very professional and respectful. The services provided by WWISE have exceeded MTNSA expectations by helping the organization create a new competitive edge in the ICT sector.

Kind regards,

A handwritten signature in black ink, appearing to read 'P. Nair', enclosed within a simple, hand-drawn oval outline.
